Cyber Future Foundation

We have entered a critical time in our society where risks to life and livelihood are being created and carried out through online exploits. The war in Ukraine has seen escalated use of cyber warfare to reduce-eliminate access to critical infrastructure. The role of our industry is changing. We are quickly becoming guardians of personal safety and security. Civil societies, governments, academia, and industry must work together to overcome these challenges.

Cyber Future Foundation is dedicated to creating a safer and more trustworthy future for cyberspace by fostering and promoting international collaboration and cooperation in the areas of cybersecurity, privacy, and digital trust.

By bringing together stakeholders from industry, government, and academia, CFF aims to advance the development of secure and trustworthy digital technologies and practices and create a world where individuals and organizations can take full advantage of the digital revolution while respecting human rights and freedoms. The Foundation works to fulfill its mission through a variety of activities, including Research, Advocacy, Education, and Community building.

To address the need of the future of cyber, we as a community need to be

Coordinated

Innovative

Progressive

To address the challenges facing our world, we need to come together.

There is much work to be done and we like to do things together, **so come join us!**

Join CFF

Three areas of our mission:

1. Thought leadership and action platform for cyber professionals
2. Strong and skilled full talent pipeline at every level of cyber organization
3. A community driven by and committed to socio-economic impact

We need your support to achieve this!
